The three items above are the release-test items of standard Q/AKSK 70-2026 for this product; the batch record reports all three as qualified and the batch as released for sale. Appearance is a product description and is not a release-test item of that standard.

Note on the source record: the batch inspection record is issued to us by the manufacturing site under its enterprise standard. Its printed Chinese product name has been aligned to our product identity (溴敌隆 / bromadiolone, CAS 28772-56-7) when this certificate was compiled; the wording discrepancy has been raised for correction at source.

Packaging, net weight and total quantity are stated on the packing list and invoice accompanying each shipment and are therefore not reproduced here.
